

135.16 Special women, infants, and children supplemental food program — methamphetamine education.

As a component of the federal funding received by the department as the administering agency for the special women, infants, and children supplemental food program, from the United States department of agriculture, food and consumer service, the department shall incorporate a methamphetamine education program into its nutrition and health-related education services. The department shall be responsible for the development of the education program to be delivered, and for the selection of qualified contract agencies to deliver the instruction under the program.
